

HAMID AHMED LAKHAN

AI / Machine Learning Engineer | Computer Vision | NLP

Karachi, Pakistan | +92 328 2186152 | hamidlakhan777@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML graduate (2026) with hands-on experience building and deploying 7+ end-to-end ML and generative AI applications across computer vision, NLP, and LLM-based systems. Completed a virtual AI/ML internship at CodeAlpha. Skilled in Python, TensorFlow/PyTorch, and cloud deployment — focused on shipping working products, not just notebooks.

EDUCATION

Bachelor of Science in Artificial Intelligence — Sindh Madarsatul Islam University, Karachi | Completed April 2026 (Result awaited)

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Git, GitHub, Excel, Jupyter, Colab

ML / AI: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Hugging Face, LangChain, OpenAI API, YOLO

Data & Deployment: Pandas, NumPy, Matplotlib, Streamlit, Flask, Next.js/React, Vercel, REST APIs

Databases & BI: MySQL, Power BI, Tableau, LIME, Grad-CAM

PROJECTS

Ecovision AI — Hybrid CNN-ViT for Land-Use Classification & Environmental Risk Modeling *(Final Year Project)*

- MobileNetV2 + Multi-Head Attention architecture achieving **94.0% accuracy** on UC Merced and 82.55% on EuroSAT (5-fold cross-validated); deployed as a Flask + Leaflet.js dashboard with LIME/Grad-CAM explainability.

ResuMatch AI — Resume-to-Job Matching Platform | [GitHub Repo](#)

Tech: Python, Streamlit, OpenAI API, LangChain, spaCy, Scikit-learn

- 90%+ semantic matching accuracy; cut resume screening time to under 5 seconds. Deployed on Streamlit Cloud.

MeetBrief — Automated Meeting Summarization Platform | [GitHub Repo](#)

Tech: Next.js/React, Whisper API, LLMs (OpenAI/Claude), Tailwind CSS

- Converts recordings/transcripts into structured summaries and action items, cutting follow-up time by ~90%. Shipped as web app + iOS app.

CodeAlpha Virtual Internship — 4 Deployed AI Tools (1 month)

- Multilingual Translation Tool ([repo](#)) — real-time, context-aware translation using Hugging Face Transformers; deployed on Streamlit Cloud.
- E-commerce Support Chatbot ([repo](#)) — LangChain-based conversational AI with <2s response time; deployed on Vercel.
- Real-Time Object Detection ([repo](#)) — YOLO + OpenCV live tracking with bounding-box visualization; deployed on Streamlit Cloud.
- AI Music Generator ([repo](#)) — text-to-audio generative model using PyTorch/MusicGen; deployed on Streamlit Cloud.

CERTIFICATIONS

- Basics of Artificial Intelligence: Learning Models — Uniathena
- Basics of Machine Learning Algorithms — Uniathena

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Core Team Member & Lead Photographer — Microsoft Learning Student Club (MLSC)
- Media Team Member — TEDxLyari
